DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William Honaker on July 21, 2005.

The application has been amended as follows:

In the abstract:

The term, "preliminary classification: 164/371; 164/352", has been deleted.

In the claims:

In claim 1, line 10, the term, "engaging" has been replaced with -- disposed between said first platen and said chill, wherein said alignment sub-assembly engages with --.

In claim 21, line 8, after the term, "movable", the following recitation has been added, -- with the shrinkage of the molten metal --.

2. The following is an examiner's statement of reasons for allowance:

The prior arts of record fails to teach the combinations of steps and components including a plurality of chills moveably with the shrinkage of the molten metal, supported by the first platen for quenching the molten metal with each of the chills being moveably between a pre-chill position prior to quenching and a post-chill position after quenching, and an alignment sub-assembly disposed between the platen and the chill, wherein the alignment assembly engages the chills for aligning the chills in the pre-chill position after the chills have quenched the molten metal and after the chills have moved to the post-chill position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
